Education

Jawaharlal Nehru National College of Engineering

Bachelor of Electronics and Communication (GPA: 7.9 / 10.0)

July 2022

Shimoga, Karnataka

Experience

Infosys Limited

Software Engineer

Aug 2022 – Aug 2024

Bangalore, Karnataka

- Designed and implemented responsive user interfaces with React and implemented a new feature using React and Redux, resulting in increase in state management.
- Implemented microservices architecture using Node.js and Express, improving API response time and used MongoDB as a database.
- Done automated testing processes with Jest and Enzyme.
- Implemented API endpoints, integrating API's and services into applications, optimizing API's for performance and scalability.
- Contributed to the adoption of agile methodologies like scrum, utilizing Jira and Confluence.
- Implemented API documentation using swagger, coding, writing test case using JUnit, debugging and troubleshooting issues in java and spring applications.

Projects

ITL [Api Development] | *Java, SpringBoot.*

- ITL is an Api development project.
- As part of this project had developed the Api's for implementing the two major features of the client Toyota.
- The Api's developed as part of this project are the intermediary Apis which interacts with other upstream and downstream Apis's for the business requirement.

E-Commerce Application | *React, Bootstrap, SpringBoot, MySQL.*

- Implemented responsive front-end design using React and Bootstrap, ensuring a seamless shopping experience across devices.
- Developed RESTful APIs with Spring Boot for backend functionalities such as user authentication, product catalog management, and order processing.
- Conducted thorough testing and debugging to identify and resolve issues, ensuring a stable and user-friendly application.

Technical Skills

Languages: Javascript, Java, Typescript, C++

Technologies: React.js, Spring Boot, Express.js, jQuery, Bootstrap, Node.js, Flutter.
